

17-02-2002

Profile

Ambitious and adaptable Software Engineer and Data Science graduate student, with solid experience in backend development and databases. Passionate about problem-solving, continuous learning, and knowledge sharing, I thrive in collaborative environments where innovation and efficiency drive meaningful results.

Languages

- Portuguese – Native
- English – B2

Skills & Competencies

- **Programming Languages:**
 - Python, C#, SQL, Java, C, Kotlin, Dart
- **Data Science & Machine Learning:**
 - scikit-learn, LightGBM, PCA, feature engineering, model validation, custom metrics, Jupyter Notebook
- **Data Analysis & Visualization:**
 - Pandas, NumPy, seaborn, Matplotlib
- **Frameworks & Tools:**
 - Django, .NET, UiPath, Android, Unity3D, SQL Server, REST APIs, Git, Azure DevOps
- **Other Technical Skills:**
 - Computer assembly, system configuration, debugging, performance optimization
- **Soft Skills:**
 - Problem-solving, analytical thinking, fast learning, teamwork, clear communication

João Eleutério

Software Engineer

EDUCATION

Master's in Data Science

Universidade Lusófona de Humanidades e Tecnologias (2023 – Present)

- Thesis focused on biomedical signal processing and machine learning for early stroke detection, including data preprocessing, PCA-based dimensionality reduction, feature engineering, LightGBM modelling, model validation, and evaluation with custom metrics.

Bachelor's in Computer Engineering

Universidade Lusófona de Humanidades e Tecnologias (2020 – 2023)

- Final Degree Project (in collaboration with CGI): Process Monitoring system for RPA orchestration using Django, UiPath, Orchestrator, and SQL-based log analysis.

Technical Degree in Computer Systems Management and Programming (Level IV)

INETE – Instituto de Educação Técnica (2017 – 2020)

CERTIFICATIONS & TRAINING

Artificial Intelligence Course

SERS (2022)

Introduction to Game Programming with Unity

ANPRI (2020)

PROFESSIONAL EXPERIENCE

Software Engineer / IT Consultant

CGI (2023 – Present)

- Backend development using .NET and SQL Server for large-scale enterprise applications.
- Design and implementation of REST APIs for multiple operational modules, including user management, vessel registration, crew management, inspections, and certification workflows.
- Database design and maintenance: creation of tables, relationships, stored procedures, indexes, and optimization of SQL queries.
- Participation in the development and evolution of the maritime management system (APPMAR), ensuring reliability, scalability, and compliance with operational requirements.

Sales Assistant (IT Department) | Worten (2021 (Christmas Season))

Retail Assistant | Liberjóia (2018 – 2020)

Waiter | Pizza Hut (2018)

INTERESTS & HOBBIES

- Programming;
- Online Gaming;
- Reading;
- Fitness.
